Technical Support & Cloud Infrastructure Engineer

Enterprise SaaS | Cloud Infrastructure | DevSecOps | Incident Response | Engineering Collaboration

Technical Support & Cloud Infrastructure Engineer with 9+ years of experience supporting enterprise SaaS, fintech, and DevSecOps platforms in high-availability production environments. Combines deep technical troubleshooting with developer enablement through automation, documentation, and close collaboration with Engineering to improve customer outcomes. Proven track record resolving complex production issues, reproducing software defects across AWS, GCP, Azure, and private infrastructure, and supporting enterprise customers with portfolios worth up to US\$9M ARR.

Technical Skills

Cloud & Infrastructure: Linux, Docker, Kubernetes, AWS, GCP, Azure, Private Infrastructure, Terraform, Ansible

Support & Operations: Incident Management, Problem Management, 24/7 On-Call Response, Zendesk, PagerDuty

Data & Scripting: PostgreSQL, MySQL, MongoDB, IBM DB2, Oracle PL/SQL, jq, Bash, Python, Ruby, PHP

APIs & Integrations: REST APIs, GraphQL, Jira Integrations

Portfolio: memilyc.github.io/portfolio (automation tools, infrastructure scripts, technical projects)

PROFESSIONAL EXPERIENCE

GitLab Inc. | Aug 2020 – May 2026

Senior Support Engineer (APAC) | Feb 2024 – May 2026

Support Engineer (APAC) | Aug 2020 – Feb 2024

Delivered advanced technical support for GitLab's Self-Managed platform across APAC, resolving complex production issues, partnering with Engineering on product improvements, and developing tooling to improve support operations.

- Promoted to **Senior Support Engineer**, owning a portfolio of SMB to enterprise customers worth up to **US\$9M ARR**, adapting technical engagement and resolution strategies to customer size, business impact, and severity.
- Reduced resolution times by triaging complex support cases, performing root cause analysis across application, database, and system logs, and partnering with Engineering to reproduce bugs and ship fixes.
- Restored service for business-critical customers by leading multi-stakeholder outage escalations across Sales, Customer Success, and Engineering, supporting AWS, GCP, Azure, and private infrastructure as part of a **24/7 on-call rotation**.
- Resolved complex enterprise issues across cloud infrastructure, SSO/SCIM, REST API, GraphQL, and integrations through environment replication, log analysis, and customer troubleshooting sessions, restoring critical development workflows.
- Reduced repeat support escalations by authoring **125+** documentation and handbook updates that strengthened customer self-service and closed recurring knowledge gaps across self-managed deployments.
- Improved support operations by developing internal tools adopted across the organisation, including a **PostgreSQL Connection Calculator** and the **Convert UTC Bot**, later deployed company-wide across **65+ countries**.
- Cut JIRA escalations and time-to-resolution by becoming the team's go-to specialist for integrations, leading **600+** cross-regional pairing sessions and developing technical training materials for Support Engineers.
- Supported rapid organisational growth by reviewing **50+** technical assessments and conducting **8+** technical interviews.

- Strengthened collaboration across a globally distributed workforce by planning and delivering GitLab's **FY23-Q3 APAC offsite** for nearly **20** colleagues from multiple countries, earning a discretionary bonus and peer recognition through nominations from **9** colleagues.

Arvato Systems Malaysia | May 2018 – Aug 2020

Systems Administrator | Feb 2019 – Aug 2020

Associate Systems Administrator | May 2018 – Feb 2019

Supported enterprise Linux, Windows, and Atlassian environments, delivering infrastructure reliability, platform maintenance, and operational improvements for development teams across Germany, Latvia, and Malaysia.

- Maintained **99.95% server uptime** across Linux and Windows environments, supporting **3,000+ developers** through ITIL-based Incident and Problem Management.
- Reduced client downtime by **40%** by delivering Jira and Confluence upgrades and migrations for **3,000+ users**.
- Improved operational efficiency by automating routine administration with Bash and PowerShell while proactively monitoring server health to prevent customer-impacting incidents.

Juris Technologies

Software Engineer / Systems Analyst | Sep 2017 – May 2018

Developed and supported enterprise loan management solutions, translating business requirements into technical solutions while contributing to Agile software delivery.

- Developed and debugged custom workflows within the **JCollect** platform using Oracle PL/SQL and IBM DB2, resolving workflow and backend data issues.
- Translated client requirements into technical specifications through discovery workshops and process flow documentation.
- Coordinated Agile delivery as Scrum Master, facilitating sprint planning and backlog prioritisation across engineering and business teams.

EDUCATION & PROFESSIONAL DEVELOPMENT

BSc (Hons) Computer Science | Sunway University, Malaysia (in affiliation with Lancaster University, UK)

First Class Honours (CGPA: 3.92 / 4.00)

Certifications:

- ITIL Foundation Certificate in IT Service Management
- SAS Certified Base Programmer for SAS 9

PUBLICATION

SQL & NoSQL Database Comparison: Performance Perspective in Supporting Semi-Structured Data | Springer, 2019

LEADERSHIP & COMMUNITY

Co-lead, Global Voices TMRG | GitLab

Fostered cross-cultural collaboration across GitLab's globally distributed workforce spanning 65+ countries, promoting inclusion and stronger connections across regional teams.
